STUDENT SATISFACTION SURVEY

2018 -2019

A Student Satisfaction Survey was conducted during the month of November using google forms among about 160 students from various programs to assess the level of satisfaction regarding the teaching methodology, teachers, institution and student support. These results help the institution to assess and evaluate their performance. They provide guidance when planning for the next academic year. Since students are our resources their satisfaction is of paramount importance. The efforts put in by the teachers must be channelled so that students are benefited in every way. This survey was a effective tool to achieve this purpose.

It was observed that in most parameters a moderate number of students were fully satisfied i.e an average of about 50% regarding, teaching methodology, student support and the institution. This provides us with a challenge to improve this to higher percentage in future.

What degree program are you pursuing now?
